EDUCATION

Ph.D. in Medical Research

Ludwig-Maximilians-Universität Munich

May 2019 – Sept 2024 | Germany & United Kingdom

Thesis - Evaluating the health and economic impact of population-based diet policies in Germany: Development, application, and comparison of simulation modeling methods

M.Sc. in Public Health

Ludwig-Maximilians-Universität Munich

Oct 2016 – Mar 2019 | Germany & United States

Thesis - Cost-effectiveness of a collaborative care intervention for diabetes co-morbid depression in India: Analysis of the INtegrating DEPrEssioN and Diabetes treatmENT (INDEPENDENT) trial

B.A. in Social Economics

Friedrich-Alexander-Universität Erlangen-Nürnberg

Oct 2012 – Mar 2015 | Germany

Thesis - Geschlechtereffekte informeller Pflege und der Einfluss der Erwerbssituation in Europa

CURRENT POSITIONS

Post-Doctoral Researcher

Professorship of Public Health and Prevention, TUM School of Medicine and Health, Technical University of Munich

Jan 2025 – Ongoing | Germany

Research activities:

- Conceptualization, implementation, and teaching of state-of-the-art microsimulation models
- Evaluation of public health policies
- Applied health economics with claims data
- Social epidemiological analyses in secondary data
- Causal inference using observational data
- Clinical prediction modeling using machine learning approaches

Responsibilities:

- Lead of the research area *Economics of Prevention and Health*
- Project initiation, planning & management
- Funding acquisition & grant writing
- Supervision of doctoral students
- Bachelor and Master thesis supervision

INTERESTS

(Public) Health Economics
What are the societal consequences and costs of chronic diseases?

Computational Approaches
How can we leverage modern computational tools to generate evidence and improve health?

Social Epidemiology
How can we explain inequalities and improve the care for vulnerable populations?

STRENGTHS

Creative | Social | Thorough | Analytic | Motivator | Leader | Communicator

R | Git | Copilot | Docker | LaTeX | Advanced statistics | Health economics | Simulation modeling | Epidemiology

LANGUAGES

German ●●●●●

English ●●●●◐

REFEREES

Prof. Michael Laxy
Public Health and Prevention
michael.laxy@tum.de
Technical University Munich

Prof. Martin O'Flaherty
Public Health, Policy and Systems
moflaher@liverpool.ac.uk
University of Liverpool

Prof. Mo K. Ali
Emory Global Diabetes Research Center
mkali@emory.edu
Emory University

- Teaching of master level courses

Honorary Fellow

Department of Public Health, Policy and Systems, University of Liverpool

Sep 2026 – Ongoing Liverpool, United Kingdom

PREVIOUS POSITIONS

Visiting fellow

Nuffield Department of Population Health, University of Oxford

Sep 2022 – Nov 2022 Oxford, United Kingdom

- Visit within the scope of my PhD thesis on the development and application of simulation modeling methods to evaluate the impact of diet policies in Germany
- Worked on multi-state life table cohort modeling under the supervision of Peter Scarborough in Oxford

Visiting fellow

Department of Public Health, Policy and Systems, University of Liverpool

May 2022 – Sep 2022 Liverpool, United Kingdom

- Visit within the scope of my PhD thesis on the development and application of simulation modeling methods to evaluate the impact of diet policies in Germany
- Worked on microsimulation methods under the supervision of Chris Kypridemos in Liverpool

Doctoral researcher

Professorship of Public Health and Prevention, TUM School of Medicine and Health, Technical University of Munich

Mar 2021 – Sep 2024 Munich, Germany

- PhD thesis on the development and application of simulation modeling methods to evaluate the impact of diet policies in Germany
- Work on the Policy Evaluation Network (PEN), Food-PlanetH, and PHfoodIMPACT projects
- Teaching of master level courses on health economics, prevention, and modeling
- Thesis supervision for bachelor and master level students
- Scientific writing, publishing, & conference presentation

Doctoral researcher

Institute of Health Economics and Management & Institute of Epidemiology, Helmholtz Munich

May 2019 – May 2023 Munich, Germany

- PhD thesis on the development and application of simulation modeling methods to evaluate the impact of diet policies in Germany
- Work on the Policy Evaluation Network (PEN) and INDEPENDENT projects
- Teaching of master level courses on health economics and prevention
- Thesis supervision for bachelor and master level students
- Scientific writing, publishing, & conference presentation

Research assistant

Institute for Medical Information Processing, Biometry and Epidemiology, Ludwig-Maximilians-University Munich

Oct 2018 – Dec 2018 Munich, Germany

- Evaluated and graded homework for students in the M.Sc. Epidemiology
- Communicated and organized homework materials

Research assistant

Institute of Health Economics and Management, Helmholtz Munich

Sep 2018 – Dec 2018 | Munich, Germany

- Supported PhD students and post-doctoral researchers in projects on the economics of diabetes and public health prevention
- Applied epidemiological and statistical analysis for scientific publications in the field of targeted prevention of pre-diabetes and diabetes self-management
- Contributed to scientific publications together with PhD students and other researchers
- Conducted systematic literature searches and provided administrative support

Visiting fellow

Emory Global Diabetes Research Center (EGDRC) at the Rollins School of Public Health, Emory University

Mar 2018 – Sep 2018 | Atlanta, Georgia, USA

- Prepared the National Health Interview Survey for a quasi-experimental difference-in-difference study on the effect of the Affordable Care Act Medicaid Expansion on diabetes outcomes
- Communicated with scientific staff from the Centers for Disease Control and Prevention for the execution of restricted access data analyses
- Attended scientific seminars and presentations on the epidemiology of cardiometabolic diseases
- Prepared data of the INDEPENDENT trial for the analysis of clinical endpoints and cost-effectiveness analysis

Intern & working student

Department of Health Economics and Outcomes Research, IQVIA

Sep 2017 – Mar 2018 | Munich, Germany

Research assistant

Institute of Health Economics and Management, Helmholtz Munich

Nov 2016 – Aug 2017 | Munich, Germany

Intern

ANregiomed (hospital network)

Nov 2015 – Feb 2016 | Ansbach, Germany

Intern

MedSolution AG (managed care organisation)

Aug 2015 – Oct 2015 | Zurich, Switzerland

University tutor

Chair for Empirical Economic Sociology & Chair for Sociology and Empirical Research in the Social Sciences, Friedrich-Alexander-University Erlangen-Nuremberg

Oct 2013 – Aug 2015 | Nuremberg, Germany

Intern

Office of Martina Stamm-Fibich, MdB (Member of Parliament)

Mar 2014 | Berlin, Germany

AWARDS

RIGorous inference in Obesity Research (RIGOR) award in 2023
For the publication: "Estimating the impact of nutrition and physical activity policies with quasi-experimental methods and simulation modelling: an integrative review of methods, challenges and synergies". Endowed with US-$2500 and a lecture.

2nd Place – Mini-oral presentation of the 16th Meeting of International Diabetes Epidemiology Group in 2019
For the presentation: "Cost-effectiveness of a Collaborative Care Intervention for Diabetes Co-morbid Depression in India: Analysis of the Integrating Depression and Diabetes Treatment (INDEPENDENT) Trial".

ENGAGEMENT & OUTREACH

Scientific Associations & Editorial Work
– Handling editor of the European Journal of Public Health
– Member of the German Association for Social Medicine and Prevention
– Steering-committee member of the Public Health Economics section of the European Public Health Association

Ad-hoc reviews for scientific journals
Nature Food, Nature Communications Medicine, Journal of Health Monitoring (RKI), Population Health Metrics, Journal of Medical Economics, Journal of Population Ageing, Public Health Nutrition, Advances in Nutrition, Deutsches Ärzteblatt International, Global Health Research and Policy, BMC Public Health

Science communication
– Article "Prävention im deutschen Gesundheitssystem neu denken", ifo Schnelldienst 79(7), 42–46, 2026
– TV interview, Quarks (WDR): "Zucker: Was er mit uns macht und wie wir besser damit klarkommen", 2026
– Research featured on the ARD news programs tagesschau and tagesthemen
– Radio interviews for regional and national news programs about the taxation of sugar-sweetened beverages
– "Wissenschaft im Brennpunkt: Die tägliche Überdosis Zucker", Podcast, Deutschlandfunk Wissen, 2024
– "Cola, Limo und Co.: Macht uns eine Zuckersteuer gesünder?", Live interview, NDR Info - Redezeit, 2023
– Invited article "Bevölkerungsbasierte Prävention von Adipositas und Typ 2 Diabetes am Beispiel einer Steuer auf zuckergesüßte Getränke" in the magazine "Lebendige Wissenschaft Diabetologie - Innovationen und Auszeichnungen 2024" published by Alpha Informationsgesellschaft mbH for the annual conference of the German Diabetes Association
– Expert contribution to issue 02/2025 of the Hartmannbund Magazin: "Superpower Prävention"
– Expert contribution to the magazine "Deutsch perfekt" published by ZEIT Sprachen

TEACHING EXPERIENCE & PHILOSOPHY

*My teaching philosophy balances **intellectual rigor** with a **supportive, active learning environment**. I strive to bridge the gap between **conceptual breadth and technical depth**, empowering students to develop **critical thinking and practical skills** that are both **demanding and professionally rewarding**.*

Evaluation Methods in Public Health and Health Care

Master of Science in Health Sciences

2021 – Ongoing | Technical University of Munich

Responsibility: Designing the core course concept, creating learning materials and exercises, teaching and examination.

Concept and content:

- Two-semester course that provides an overview of the approaches, concepts, and methods used in the evaluation of public health and health care interventions
- Interactive and applied course that enables students to critically appraise published evaluations and to plan and conduct their own evaluations
- High emphasis on modern quantitative research methods including regression, sample size calculation, design and analysis of experimental designs, matching approaches, causal inference with quasi-experimental designs (Difference-in-Differences, Regression Discontinuity Design, and others), and simulation modeling techniques
- Explicit focus on the assumptions underlying modern quantitative methods and the critical appraisal of these assumptions in the context of applications
- Foundations of evidence generation and synthesis including meta-analysis
- Empirical exercises of quantitative research methodologies using simulated datasets in R
- Oral examination format and student evaluation with focus on individual development and critical reflection

Public Health and Socioeconomic Aspects in the Prevention of Non-communicable Diseases

Master of Science in Health Sciences

2021 – Ongoing | Technical University of Munich

Responsibility: Designing the core course concept, creating learning materials and exercises, teaching and examination.

Concept and content:

- Interactive and participative seminar on non-communicable disease (NCD) research and prevention with an explicit focus on social determinants of health
- Comprehensive approach covering historical societal developments shaping the burden of NCDs in the 21st century, theories of health behavior and inequalities, determinants of health, complexity in socioeconomic health inequalities, rationales and concepts of prevention, and cost-effectiveness and equity aspects of interventions and policies
- Particular emphasis on connecting theoretical foundations and conceptual themes to specific contemporary drivers of disease, health determinants, and prevention approaches
- Encouragement of students to share their own perspectives and idiosyncratic experiences in classroom discussions to contextualize the contents of the seminar
- Examination through student group presentations and individual reflective reports that aim to connect the lived experiences of students directly with the content of the seminar

Guest lecturer: Public Health Nutrition

Master of Science in Epidemiology / Public Health

2023 – Ongoing | Ludwig-Maximilians-University Munich

Responsibility: Creating learning materials and teaching.

Concept and content:

- Comprehensive course on public health nutrition led by Prof. Dr. Peter von Philipsborn
- Lecture on quantitative methods for the evaluation of nutrition interventions and policies
- Conceptual introduction to the topic using various case studies and real-world examples
- Focus on ex-post evaluation using observational data and quasi-experimental study designs and ex-ante evaluations using complex simulation models combining epidemiological and health economic evidence

Guest lecturer: Economic Evaluation in Healthcare

Master of Science in Epidemiology / Public Health

2019 – 2020 | Helmholtz Zentrum München

Responsibility: Updating learning materials and teaching.

Concept and content:

- Comprehensive course (since discontinued) on the economic evaluation of healthcare interventions
- Several lectures on statistical approaches for the analysis of health economic data including generalized linear models and bootstrapping

KEY PROJECTS & EXPERIENCE

Incorporating social determinants of health in the prediction of diabetes incidence and diabetes care outcomes in India (SOC-DIAB)

German Center for Diabetes Research

2026 – 2027 (24 months) | Technical University of Munich

- Successfully secured funding for the application of machine learning methods to predict diabetes outcomes in a large cohort study in India
- Coordinated contracts and data requests between multiple international stakeholders

Modeling a prevention package to tackle unhealthy diets in Germany (AOK-PREV)

AOK-Bundesverband

2026 – 2027 (24 months) | Technical University of Munich

- Successfully coordinated a collaboration contract with the prevention section of the federal association of a large German health insurer (AOK-Bundesverband) to evaluate the health and economic impact of a package of nutrition policies in Germany

- Coordinated project timelines and data requests between multiple national stakeholders

Leveraging large claims data for health economic and social epidemiological analysis in Germany

DAK-Gesundheit

2025 – 2029 (5 years) | Technical University of Munich

- Successfully initiated and coordinated a collaboration with the DAK-Gesundheit, a large national health insurance to enable the use of their administrative data for health economic and social epidemiological analysis in Germany
- Coordinated project timelines, project descriptions, and data deliveries between stakeholders

Modeling the health and economic burden of unhealthy diets in Germany (PHfoodIMPACT)

Else Kroener-Fresenius-Center for Nutritional Medicine

2024 – 2027 (4 years) | Technical University of Munich

- Conceptualizing methods to replicate complex dietary patterns in a synthetic population for microsimulation
- Leading the development of a microsimulation model to estimate the attributable health and economic burden of unhealthy diets in Germany
- Supervising the creation of a data processing pipeline to estimate epidemiological simulation parameters for cancers, cardiometabolic diseases, respiratory diseases, and obesity-related orthopedic conditions with health insurance claims data
- Supervising the conceptualization and implementation of statistical models to estimate healthcare cost in health insurance claims data
- Teaching of workshops on microsimulation modeling with IMPACT NCD Germany
- Developed templates and guidance to support PhD students in the development of simulation models
- Setup of project management tools in Microsoft Teams to coordinate timelines and tasks of several PhD students
- Initiated and coordinated a collaboration with a large health insurance company in Germany including contracting and data requests

Food Environments for Planetary Health: Impact of School Nutrition Standards (Food-PlanetH)

German Federal Ministry of Education and Research

2023 – 2027 (5 years) | Collaboration with Ludwig-Maximilians-University Munich

- Leading the development of a microsimulation model to evaluate the environmental impact of nutrition policies
- Supervising a PhD student in the evaluation of school nutrition policies in Germany using microsimulation
- Conceptualizing and coordinating a project on the analysis of health behaviors in children and adolescents including trajectories into adulthood
- Development of a Windows application to efficiently integrate simulation modeling workflows using Docker
- Setup and maintenance of a Linux workstation to run microsimulation models
- Administration of a GitHub organization to coordinate simulation modeling activities between several PhD students

Policy Evaluation Network (PEN)

EU JPI "A Healthy Diet For A Healthy Life"

2019 – 2023 (4 years) | Helmholtz Munich & Technical University of Munich

- Created and published a detailed systematic review protocol
- Applied systematic review and evidence synthesis methods to understand simulation modeling for nutrition policy evaluation
- Initiated and maintained collaborations with international experts in policy evaluation
- Estimated and collected the health economic input parameters for a microsimulation model (direct costs, indirect costs, health utilities)
- Applied advanced statistical, epidemiological, and demographic analyses to estimate input parameters for simulation models
- Conducted a forecast of mortality for cardiovascular disease in Germany using a Bayesian Age-Period-Cohort model
- Collaborated with agricultural economists to conceptualize and implement an economic demand model for non-alcoholic beverages in Germany

- Conceptualized, developed, calibrated, and applied a microsimulation model (IMPACT NCD Germany) to evaluate nutrition policies in Europe
- Adapted a multi-state life table cohort model (PRIMEtime) to enable the comparison with a microsimulation
- Conducted an extensive health and economic evaluation of sugar-sweetened beverage taxation in Germany using IMPACT NCD Germany
- Developed a framework to better understand synergies between simulation modeling and causal inference approaches for policy evaluation
- Wrote and published several scientific articles in high-impact journals
- Active science communication in public media (interviews, podcasts, social media) and on international conferences
- Organized an international workshop on policy evaluation

INtegrating DEPrEssioN and Diabetes treatmENT (INDEPENDENT) trial

US National Institutes of Health

2018 – 2022 | EGDRC, Emory University & Helmholtz Munich

- Analyzed primary and secondary effectiveness outcomes for the main scientific publication of the INDEPENDENT clinical trial that evaluated integrated care for patients with diabetes and depression
- Conducted a cost-effectiveness analysis of the INDEPENDENT clinical trial
- Worked in and collaborated with a top international diabetes and cardiometabolic research team
- Led one and contributed to several more scientific publications in high-impact journals

FUNDING ACQUISITION

Modeling a prevention package to tackle unhealthy diets in Germany (AOK-PREV)
Type: Cooperation contract
Funder: AOK-Bundesverband
Role: Principal Investigator
Collaborators: AOK-Bundesverband
Duration: 2026-2027 (24 months)

Incorporating social determinants of health in the prediction of diabetes incidence and diabetes care outcomes in India (SOC-DIAB)
Type: Competitive third-party funding
Funder: German Center for Diabetes Research / German Ministry of Research, Technology, and Space
Role: Co-Principal Investigator
Collaborators: Prof. Mo Ali (Emory University, USA), Prof. Nikkil Sudharsanan (Technical University of Munich), Cardiometabolic Risk Reduction in South Asia (CARRS) cohort
Duration: 2026-2027 (24 months)

PROPOSALS IN PREPARATION

Triangulating Obesity Risk and impact of cumulative disadvantage across Critical life pHases (TORCH)
Type: Competitive third-party funding
Funder: ERA4Health / German Ministry of Research, Technology, and Space
Role: Principal Investigator & consortium coordinator
Collaborators: Prof. Solveig Cunningham (Netherlands Interdisciplinary Demographic Institute), Prof. Terje Eikemo (Norwegian University of Science and Technology), Dr. Mirza Balaj (Maastricht University), Prof. Joao Vasco Santos (University of Porto), Vanessa Gorasso (Sciensano)
Duration: 2027-2029 (36 months)
